

DynaVox DynaWrite

The DynaVox DynaWrite is designed to give augmented communicators independence and control over their environment. Keyboard-based, it allows for fast, efficient communication with a familiar interface, and is ideal for individuals with literacy skills and typing ability, from single finger to touch typing. The large display shows the entire message-up to 10 lines of text. A synthesized voice produces any word or phrase typed or selected by you, and rate enhancement features like word prediction enable you to compose messages quickly and easily. For even more usability, the DynaWrite can connect with your PC, help you to talk on the phone and act as a universal remote control for common household appliances. Now that's a conversation piece with real functionality!

Communicator Profile

Ideal for individuals with strong literacy skills, motor control and dexterity who like the familiarity of a computer keyboard, the DynaWrite allows augmented communicators to easily create messages of any length or complexity. Individuals with varying communication needs can use the DynaWrite to:

- Store phrases and messages and “play” them back using a variety of voice options.

- Compose messages quickly and easily using the full-size keyboard with word prediction.
- Extend the use of your own voice by storing hours of favorite phrases, expressions, stories and more with Voice Banking.

The DynaWrite is a “dedicated” device, and is intended for speech generation only. It does not offer full computer functionality.

Features & Benefits

The DynaWrite’s familiar ‘type-and-talk’ design makes it intuitive for users with or without experience with other speech devices. It allows users to extend the use of their voice by recording messages of varying length using the Voice Banking feature for playback at a later time. They can also maintain control over their environment through infrared control of a television, CD or DVD player, infrared phone and any other appliance operated with a remote control.

Additional features of the DynaWrite:

- Use the familiar keyboard interface to compose messages immediately while viewing your message on the screen.
- Compose messages efficiently with rate enhancement features like word prediction, abbreviation expansion and spell-checker.
- Connect the DynaWrite to your PC for emailing, word processing and all your favorite applications with a wired or wireless connection.
- Replace a standard keyboard with the DynaWrite’s keyboard to interface with a computer.
- Use the built-in microphone and Voice Retention Technology from DynaVox to bank up to an hour of digitized voice recordings of favorite phrases, expressions, or stories.
- Communicate easily using the “Speak” button, which uses natural-sounding DECTalk or VeriVox synthesized voices.
- Choose from US, UK, or Australian English or a bilingual French Canadian/US English versions, all of which display menus, word prediction and Help content in English or French.
- Access methods include the integrated keyboard and single and dual-switch scanning for a range of communicators.

Access Methods

DynaVox strives to match a user's challenging and changing access requirements. Each of these unique selection methods can be customized to suit the needs and goals of an individual. Access methods include:

- **Integrated keyboard** – Compose messages as you would with a standard keyboard. Connect the integrated keyboard to your PC in place of a standard keyboard.

- **Scanning** – Highlighting is used in a specific pattern so individuals can use a switch (or other device) to make a selection when the desired object is highlighted. Both single switch and dual switch scanning is available for use with the DynaWrite.

Accessories

Accessories available for use with the DynaWrite will help you customize your DynaWrite to meet all of your needs. They include:

- SCATIR Switch
- Keyguards and Moisture Guards
- Protective Carrying Case

- User-Accessible Carrying Case
- Handles and Shoulder Straps
- AccessIt
